

LIVERPOOL WATERS:

The Opportunity Of A Lifetime.

This seminar series intends to build upon the conversation begun by Peel in their public consultations. Engage has brought together an exceptional group of national and international experts to help us deepen the conversation and add some new perspectives.

Engage is grasping this moment presented by the proposed redevelopment of Central Docks in a constructive and collaborative manner. This project by its sheer scale is indeed the opportunity of a lifetime. Engage is determined to make a positive contribution to the debate about the vision that the city has for this large and historic part of our cultural heritage.

Regenerating a truly global city is the work not only of the professionals and elected officials but of every citizen. Engage is creating a space where everyone can join together in a conversation characterised by respectful listening and dignified thoughtful sharing. We encourage you to attend all three seminars, the third of which will bring together insights from the first two and root the reflections in a genuine Liverpool response.

Registration is essential, please visit:
