

Liverpool has improved dramatically from the city it was during the last half of the 20th century. There have been some creative and innovative decisions made regarding its regeneration including significant investment in the city centre's public realm. One area of unfinished business however is movement around the city centre.

liverpool on the move

A series of seminars tackling movement and connection in the 21st century

The three seminars in this series will focus our attention on international and national urban examples of good practice and inspirational ideas. Engage hopes to contribute positively to the vision that will drive Liverpool's ambition to be a world-class city also at the level of movement and connectivity.

Mayor Anderson will present his ideas to the city at the final seminar. We encourage you to attend all three seminars to get the most from this civic initiative.
