

PLAYING OUR PART

Engage is delivering a seminar series this year that situates our residential community at the heart of the wider Liverpool City Region. Our themes matter a great deal to people everywhere - cycling and walking, homelessness and rough sleeping, devolution and governance.

To help our reflections we are bringing international and national speakers with massive experience and expertise in these areas - from Denmark, Finland and the UK. There will be interventions from the City Region Combined Authority and activists from across the region are invited to form part of the Local Panel at each seminar. There is a growing awareness that those of us who live in the city centre and waterfront need to play our part in the emerging City Region and we invite you to participate in exploring how the solution to some of our biggest challenges might lie in our working together at a regional level.
