

# SUSTAINABLE LIVERPOOL:

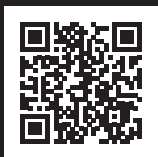

## Learning from European Green Capital Cities

Few people would disagree that the climate crisis and the need to reach net zero targets are amongst the most important issues facing our species. Engage as the voice of residents of the waterfront and city centre invites everyone to reflect on Liverpool's response so far to the challenge to become a more sustainable city.

We will learn from three impressive and inspirational cities, each of which has evidenced its status as a European Green Capital (EGC) by being given this highest accolade. Tallinn in Estonia was EGC last year and Valencia is EGC this year and Bristol EGC in 2015 was the only UK city ever to achieve this distinction.

We will also be supporting our newly appointed LCC Sustainability Manager Simon Mansfield who will address each seminar. And there will be Local Panels of cultural actors, politicians, activists and academics to ensure a local perspective.

Registration is essential, please visit: [www.engageliverpool.com/events](http://www.engageliverpool.com/events)
